

Counterweight EHZ GG-440

The counterweight GG-440 is used to weigh down cables and to provide a pivot point for the float switch. Retro fitment is possible. It is made of stainless steel and therefore resistant to water, waste water, oils and fats as well as many acids and bases. Also it is suitable for food, chemical and pharmaceutical industries.

Note: Depending on the application, the counterweight needs to be cleaned / disinfected with a suitable product before use.
